and clean it immediately with hot water and soap.

**Conditions of application** : Do not apply at temperatures below 10°C and above 35°C.

**Storage** : Store at temperatures from 5°C to 40°C. Close the container after every use.

## APPLICATION

### Stir well before use

The substrate must be clean, dry and free of foreign matter and substances. First apply a layer of the special primer SOVADUR or TETRADUR primer (waterproof substrates with high penetration and strong adhesion). After the primer dries stir the material well and apply it with a stainless polished spatula or using an appropriate plaster sprayer gun. While the Sovalux Decor layer is fresh (about 15-20 minutes later), the surface finish is "pressed" or "scrubbed" using a plastic spatula.

## HEALTH, SAFETY AND ENVIRONMENTAL INFORMATION

Handle with care. Before and during use, observe all safety labels on packaging and paint containers, consult TETRALUX Safety Data Sheets and follow all local or national safety regulations.
