## TECHNICAL DATA SHEET

Date of issue: 2021

---

**Storage** : Store at temperatures from 5°C to 40°C. Close the container after every use.

---

## APPLICATION

### Stir well before use

---

Surfaces must be clean, dry and free from foreign objects and substances. It is applied in two layers for a perfect result. It dries in one hour and it can be recoated after 5-6 hours. These times depend on weather conditions. For unpainted or old wooden surfaces, we use as a substrate AQUA PRIMER of TETRALUX. For unpainted or old metal surfaces we use as substrate anticorrosive TETRARUST of TETRALUX.

---

Minimize paint wastage by estimating how much paint you will need. Recover unused paint for reuse. Reuse of paint can effectively minimize the products life cycle environmental impact. In case of residual paint, keep the container tightly closed after opening and store in dry and cool place out of reach of children. In case of unused residual paint, it is required special handling. Therefore it should not be thrown away into drains, watercourses or soil.

---

## HEALTH, SAFETY AND ENVIRONMENTAL INFORMATION

Handle with care. Before and during use, observe all safety labels on packaging and paint containers, consult TETRALUX Safety Data Sheets and follow all local or national safety regulations.
